

# Investment-linked Fund Prices

December 2009

Investment-linked fund prices as at the last price available on 30 November 2009.

This document is to be used in Hong Kong only and should be issued and read in conjunction with the Principal Brochure, which consists of the Annual Charges leaflet, Investment-linked Funds leaflet and Product Brochure.

## Key features and risk

- Friends Provident International Limited (FPIL) issues investment-linked assurance policies which are insurance policies providing access to the investment-linked funds.
- Your investment is not segregated from the assets of FPIL, and is therefore subject to the credit risk of FPIL.
- You are not investing in the underlying funds of the investment-linked funds and you have no rights or entitlements to these underlying assets.
- The return on your investment is calculated with reference to the fluctuations on the performance of the underlying funds.
- Investment involves risk and each investment-linked fund will involve its own individual investment objective and level of risk. These are described on page 8.
- FPIL's investment-linked assurance policies are intended for medium to long-term investment. Early termination of your policy may result in significant investment loss.
- You should not purchase an investment-linked assurance policy unless you understand it and it has been explained to you how it is suitable for you. The final decision is yours.

For details, including fees and charges of the policy, please refer to the relevant Principal Brochure.

## Investment-linked fund information

Friends Provident International Limited (FPIL) operates a range of investment-linked funds. The concept is simple: agreements have been set up with investment houses worldwide allowing us to link to specially selected underlying funds chosen on the basis of performance and investment expertise. FPIL has set up its own investment-linked fund which invests solely in such underlying fund, apart from a proportionately small amount which may be held as a cash balance.

These investment-linked funds are intended for medium to long-term investment and can only be accessed using FPIL's investment-linked assurance policies. These policies are also intended for medium to long-term investment and are not therefore designed for early surrender (see **Policy information** on page 11). Substantial surrender charges/penalties will be applied in the event of early surrender. There may also be restrictions on the amount of withdrawals available from a policy and you should refer to the relevant Principal Brochure for more information. A withdrawal charge of up to 7.5% of the bid value of the amount of withdrawal may be applied.

Our policyholders invest their premiums into FPIL's investment-linked assurance policies. According to policyholders' chosen investment-linked funds, FPIL invests these premiums collectively in the underlying funds. Units are notionally allocated to your policy solely for the purpose of calculating the benefits which we will pay to you. FPIL is the absolute legal and beneficial owner of all the assets which relate to each investment-linked fund. Policyholders have no rights or entitlements to these underlying assets. The price of the FPIL investment-linked fund will be different from the underlying fund, but should move broadly in line with it.

The underlying investments of the investment-linked funds are unit trusts authorized by the Hong Kong Securities and Futures Commission. Such authorization does not imply official recommendation. In giving the authorizations, the Commission has made no assessment of, nor does it take responsibility for, the financial soundness or merits of the unit trusts, nor has it verified the accuracy or truthfulness of statements or opinion expressed in the documentations.

Units in the investment-linked funds are normally bought and sold using the 'bid' (selling) price. However, some legacy products do contain a bid/offer spread — please refer to the individual product brochures for details.

**Please note that there are fees for the policy and investment-linked funds that would in turn affect the return on your policy, which may be lower than the return on the underlying funds.**

Please refer to the corresponding prospectuses of the underlying funds, which will be made available by FPIL's Hong Kong office. These prospectuses will help you to understand the underlying funds, their investment objectives and strategies, the risks that may affect your investment, whether your financial goals are matched, etc. Please do not rely on these documents alone. We recommend that you discuss fully both the suitability of the Investment-linked assurance policies and the specific risks associated with your investments within these policies with your Financial Adviser before making any investment decisions.

Investment-linked fund prices may go up and down depending upon the underlying investment performance or, where investments held within an investment-linked fund are not denominated in the currency of that investment-linked fund, simply because of movements in currency exchange rates. Where we publish performance information, the figures are quoted net of all annual fund charges. However, past performance should not be viewed as an indication of future performance – the value of your investment cannot be guaranteed and you may get back less than you paid in.

### Valuation frequency and availability of unit prices

Valuations are carried out on all business days in the Isle of Man as appropriate for the individual investment-linked fund. Unit prices are issued daily at approximately 5 p.m. (UK time). Please note that some underlying funds do not price on a daily basis – any affected investment-linked funds have been clearly marked on pages 9 and 10 of this document.

### Investment-linked fund price roundings

In pricing each investment-linked fund in the FPIL investment-linked fund range, we may reasonably round any calculations by an adjustment of not more than 0.001%. All rounding adjustments accrue to the benefit of the policyholders who invest in that investment-linked fund.

The maximum offer price and the minimum bid price are calculated each valuation day. The maximum offer price is rounded up to two decimal places and the minimum bid price is rounded down to two decimal places.

### Key to the symbols used in this leaflet

3: Investment-linked funds closed to new investors.

Investment-linked funds deal on a daily basis except where indicated: <sup>7</sup> Deals weekly.

<sup>†</sup> The underlying fund of this investment-linked fund is authorized by the Hong Kong Securities and Futures Commission (SFC) under the Code on Unit Trusts and Mutual Funds, but not authorized or regulated under the SFC Code on Real Estate Investment Trusts. Such authorization does not imply official recommendation.

# Risk Factors

Investment involves risk and each investment-linked fund will involve its own individual level of risk:

- Eq** Where an underlying fund invests in equities, it entails risk, as individual stock prices can move up and down more dramatically than other forms of investment. Shares, when sold, may be worth less than their original cost and you may get back less than you paid in.
- Li** Some underlying funds invest in asset classes that are considered illiquid, in that sometimes they may not be so easy to sell. It should be recognised that an investment in an investment-linked fund of this type may have liquidity constraints that may lead to delays in the sale of investment-linked fund units.
- FI** Where an underlying fund invests in fixed interest securities the value can go up and down as interest rates change. For example, if interest rates rise, the value is likely to fall.
- B** Some underlying funds invest in company bonds. High yielding bonds are usually lower grade. These carry an increased risk to both the income and capital value of the investment-linked fund – for example, if the company issuing the bond has financial difficulties and stops trading.
- Com** Some underlying funds invest in commodity markets and investment values can move up and down sharply depending on levels of speculation and supply and demand.
- EM** Where an underlying fund invests in emerging markets, investment values can move sharply down or up. These markets tend not to be so well regulated as developed markets and political unrest is more likely.
- D** Many underlying funds can now use derivative instruments as an investment tool. A derivatives instrument normally is a contract between two or more parties and, used in underlying funds, derives its value based on the value of an underlying asset at a particular point in time. The main types of derivatives are futures, forwards, options and swaps, with these instruments generally being used to hedge (reduce) risk, but can also be used for speculative purposes (at increased risk). Losses can be greater than the money put into these instruments.
- H** Hedge funds and funds of hedge funds aim to produce returns superior to those of bonds and equities irrespective of market direction, therefore profiting throughout the changing world economic cycles of Recession, Recovery, Boom and Slowdown. Because hedge funds have more flexibility in their investment strategies, often using derivatives instruments, they can carry the same risk as outlined above.

## Guide to the Risk/Reward Profile of FPIL's investment-linked funds on pages 9 and 10

The Risk/Reward Profile is derived from information provided by the underlying fund houses and is based on the following characteristics of the underlying fund:

- volatility;
- asset type; and
- geographical region.

The information given in the Risk/Reward Profile is for reference only and the Hong Kong Securities and Futures Commission has not assessed or approved it, nor has it verified the accuracy of such information.

- Grade 1:** Investment-linked funds offering conservative return similar to money market rates. **The underlying funds that these investment-linked funds invest in may be exposed to the following risk factors: FI.**
- Grade 2:** Low-risk investment-linked funds offering security and potential growth. **The underlying funds that these investment-linked funds invest in may be exposed to the following risk factors: FI, B.**
- Grade 3:** These investment-linked funds take a balanced approach to investment by holding a diverse portfolio of assets. **The underlying funds that these investment-linked funds invest in may be exposed to the following risk factors: Eq, FI, B.**
- Grade 4:** A more focused equity exposure provides good growth potential with the risk of short-term volatility. **The underlying funds that these investment-linked funds invest in may be exposed to the following risk factors: Eq, Li, FI, B, Com.**
- Grade 5:** These aggressive investment-linked funds balance the risk of high volatility with the potential for high capital growth. **The underlying funds that these investment-linked funds invest in may be exposed to the following risk factors: Eq, Li, FI, B, EM, Com, D, H.**

## Cautionary notes

### Policy information

The documentation of Friends Provident International Limited's (FPIL) investment-linked assurance policies has been authorized by the Hong Kong Securities and Futures Commission pursuant to Section 105(1) of the Securities and Futures Ordinance. Such authorization does not imply official recommendation. In giving the authorizations, the Commission has made no assessment of, nor does it take responsibility for, the financial soundness or merits of the investment-linked assurance policies, nor has it verified the accuracy or truthfulness of statements or opinion expressed in the documentations. The constitutive documents of the investment-linked assurance policies are available for inspection at FPIL's Hong Kong office at the address given on the back of this document.

Each policy is governed by and shall be construed in accordance with the law of the Isle of Man. However, this will not preclude the right to bring legal action in a Hong Kong court.

#### Illustration of Surrender Value

Applicants will be required to sign an illustration document as part of the application for a policy. This document includes a table of figures which shows the impact of fees and charges on the policy and their effect on surrender values. The figures are based on certain assumptions as stated in the document.

FPIL's investment-linked assurance policies are intended for medium to long-term investment and are not therefore designed for early surrender. If you do surrender early, a discontinuance charge will be applied. Early termination of your policy may result in significant investment loss.

If you have invested in an FPIL Reserve, or a similar personalised bond from FPIL, and include these investment-linked funds in your portfolio of assets, please be aware that the Administration Charge of, currently, 1.2% of the bid value of each investment-linked fund each year, will be applied. This Charge is debited directly to the investment-linked fund on each valuation day.

Investment-linked assurance policies may not be suitable for everyone. We recommend that you read the Principal Brochure and all associated documents carefully and discuss fully both the suitability of these investment-linked assurance policies and the specific risks associated with your chosen investments within these policies with your Financial Adviser before making any investment decisions.

### Policyholder protection

To ensure the protection of policyholders' interests the Isle of Man Insurance and Pensions Authority (the regulator) has put in place a number of statutory measures:

- **Ring fencing of assets** — in accordance with the Insurance Act 2008 (the Act) FPIL keeps policyholders' premiums received in a special 'long-term business fund', which can only be used to meet the claims and long-term liabilities of policyholders. FPIL also holds funds in excess of its long-term liabilities, and submits independently audited annual solvency reports to the regulator, in accordance with the Act.
- **A policyholder compensation fund** — in the event that the above measures fail, and the insurer is unable to meet its liabilities, all policyholders will receive the protection of the Life Assurance (Compensation of Policyholders) Regulations 1991 of the Isle of Man, wherever their place of residence. The Regulations ensure that in the unlikely event of FPIL becoming insolvent, a levy would be made against all other Isle of Man resident life assurance companies so that up to 90% of our liabilities to eligible policyholders would be met (without any upper monetary limit).

Investors should be aware that specific investor protection and compensation schemes that may exist in relation to collective investments and deposits accounts are unlikely to apply in the event of failure of such an investment held within investment-linked assurance policies.

Complaints we cannot settle can be referred to the Financial Services Ombudsman Scheme for the Isle of Man.

Please note that some telephone communications with FPIL are monitored and may be randomly interrupted.
